ELECTION/RESTRICTION

ELECTION/RESTRICTION - LACK OF UNITY

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1. In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

Group I: Claim(s) 26-47, 56-60 drawn to method of magnifying a signal associated with one or more bases of a sequence in a target nucleic acid molecule.

Group II: Claim(s) 48-55, 61 drawn to a method of sequencing all or a part of a target nucleic acid molecule.

Group III: Claim(s) 62-64 drawn to a method of producing a map of a target nucleic acid molecule.

2. The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical feature(s).

The method of group I requires treating a target nucleic acid molecule at least three times to convert a region of said target nucleic acid molecule to an adapter binding region whereas the methods of Group II and III have no such requirement. In addition all three groups are directed towards methods with different stated goals. In view of these findings the examiner has determined that the claims are not linked by a special technical feature which distinguishes over the prior art. Accordingly, the applicant is required to elect a single invention to which the claims must be restricted.

3. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

⇒4. Please clarify the preamble of Claim 56 which recites "The method of as in Claim 43". Does the applicant truly intend Claim 56 to be dependent on Claim 43 and not Claim 48? Please clarify.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ethan Whisenant, Ph.D. whose telephone number is (703) 308-6567.
